

# Hovering Hummingbird

Design by Marianne Crivellaro, Text by Darlene Welch

Hummingbirds are fascinating little creatures and are among the smallest in the avian world. They are so small, in fact, that those of us who are lucky enough to encounter one zooming by while we're out and about may assume that it's just a really large insect. Since hummingbirds come in a surprising array of color combinations, this design will be perfect for letting your creativity go and trying different glass colors besides the ones offered here. Make the bird and flowers match your favorites from the area where you live or change the border colors to match your own decor. The choices are endless and all yours.

This 7" x 11" pattern originally appeared in the book, *Fabulous Florals*, part of *The Ultimate Pattern Book, Volume 2* from Marianne Crivellaro. With more than 300 full-size suncatcher and small panel designs for beginning and intermediate glass artists and hobbyists, there is something for everyone. Besides *Fabulous Florals*, the collection also includes *Adorable Angels*, *From the Heart*, *Patchwork Quilts*, *Celtic Knots*, *Mini Victorian Accents*, and six other complete pattern books. These patterns would also provide a great resource for mosaic and fused glass artists. **GPO**
